

Rice Mill and Powder Crusher Combined Machine

- Multi function. It can skin rice, corn and bean etc. It also has the powder crushing ability, such as rice, wheat, grain sorghum, corn, spice, and chili. It will finish the chaff, whiteness the rice and separate the whole rice from the broken at one go.
- Easy to operate. If you want to use the milling function, start the machine, just put the switch at the rice milling function. With the adjustable handle, increase the pressure, it will be done. If use the powder crushing, put the switch at the powder crushing function. Control the material inlet or change the inner screen, feed the material, it will be done.
- Full enclosed design, the chaff and powder can be collected in bags, non-pollution is realized. Convenient to maintain. Just open the upper cover, the inner of the machine can be checked and cleaned.
- Can be in fixed and removable situation, there are slipped pulleys fixed at the bottom of the machine.
- Safe job. It can normally work in full loading condition, no worry at all for overloading or long working time.

Specification :~

Rice mill				
Rotor diameter (mm)	Shaft Speed (r/min)	Power consumption (kw.h/t)	Productivity (kg/h)	Sound(dB(A))
60	1400	≤12kw.h/t	≥160	≤93
Powder crusher				
Rotor diameter (mm)	Shaft speed (r/min)	Power consumption (kw.h/t)	Productivity (kg/h)	Sound (dB(A))
190	5500	≤26 (tooth type) ≤10 (hammer type)	≥120	≤93
210	5500		≥140	
230	5000	≥160		
Power				
Motor	Power(KW)	2.2	Voltage (V, hz)	220, 50/60
Engine	Power (Hp)	3.5
