

Electric Ice Cube Maker

SD-18

SD-43

SD-90

SD-150

Function:~

You should connect water pipe for the machine The water pressure should be between 0.1 – 0.5MPa. The flow can be adjusted by the tap and depends on the drainage volume of frost-melting. If the drainage is big, turn up the tap, if the drainage is small, turn down the tap.

The silicon balls inside the machine are prevention of the internal bottom from striking of the ice falling down. So, the silicon balls have to be put operation and taken out of cleaning regularly. Therefore, it is the best choice & ideal for any food service kiosks such as for hotels, restaurants and west-style food shops.
