

## DIGI SM-100

**SM-100** – perfect scales for shopping centers, and ideal for all types of food stores, small culinary, pastry and packing workshops. Scales have integrated ETHERNET port for exchange of accounting data with company's computer network.

**SM-100** exchange protocols are compatible with most popular accounting programs in Lithuania, Latvia, Estonia. Also scales have the ability to automatically receive information from company's computer network about the changes made with product prices, and all other relevant data without interfering with weighing process.

**SM-100** printer accelerates cassette type printer and facilitates the process of label replacement. If you use different size labels, you are able to use optional printer cassettes for faster label roll change. Label information pattern is freely editable, you can enter graphic signs.
