

## SP-390

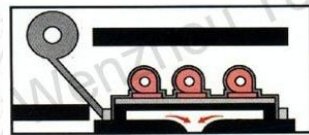

Semi-automatic machine for discrete manufacture of Skin packages, aimed at industrial products: accessories, spares, household, etc.

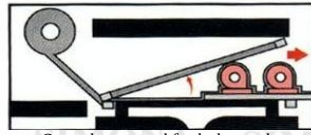

1. Put the products on the cardboard, then put the cardboard to the worktable and let the film heat by heating elements.

2. After heating for a while, the film will get down to cover the products.

3. The vacuum pump will start and siphoning the air, then the film will stick to the products and the cardboard.

4. Open the tray and fetch the products.

### Functions

- Pack the products by film and cardboard without molds.

### Features:-

- Heating by Halogen lamp or nickel-chrome wire.
- Halogen lamp heating (low heat rate but stable performance).
- Nickel-chrome wires heating (high heat rate but fragile).
- Manual feeding the products to the worktable.
- Automatic heating the film and packing the products.
- Easy to use by using digital time relay to control the operation.

### Specification :-

Model	SP-390
Packaging size	540mm x 390mm
Vacuum pump	20m <sup>3</sup> /hour
Speed	2~3times/min
Weight	160kgs
Voltage	220v 50~60hz or 380v 50~60hz
Power	5kw
Machine Dimension	840mm x 630mm x 1380mm
