

V TYPE FOOD MIXER

Usages & Features :

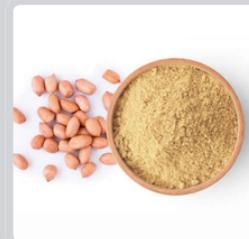

- This machine has the following distinguishing features, no blind eagle in the cylinders, no accumulation of materials, high speed, and short mixing time. The body is made of stainless steel, both inner and outer walls polished, the cylinders have elegant appearance. The charging of materials can be made either by manual operation or through vacuum suction. For discharging, rotating valves and rapid swivel heads are adopted. It consists of two VH of different or same altitudes, and through mechanical transmission, the materials in these shells are made to move back and forth, crossed over and rotate 360° to achieving ultimate uniform mixing.

Applications:~

- "V" type mixer is suitable for use in the pharmaceuticals, chemical and food industries for mixing powder or granular materials.

VH-100

- Barrel Capacity (L): 100
- Feed Volume coefficient: 0.4
- Max Feed weight (Kg): 28
- Agitation speed: 15r/min
- Mix with time (min): 6-8
- Motor Power (kw): 1.5 kw
- Material: 304 S/Steel
